State of Art

Desire Windows establish in 2009 located in Rithala (Delhi). Since 2009, We are providing hassle free uPVC Windows & Quality assurance is on high importance in our premises. The Desire Windows Company open an almost infinite range of design possibilities for uPVC Doors & Windows

A quality product by Desire Windows is quintessential combination of good design and unique properties to assure its valuable clients. Our aim to provide a better world to live by saving Natural Resources like

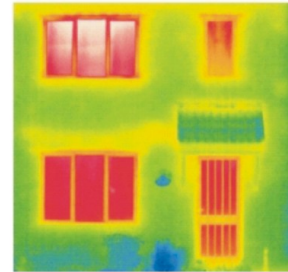

Door & Windows play a crucial role for a home in terms of style & security. The traditional windows and doors require maintenance time after time due to the change in weather. Moreover, Sometimes as the time passes it ruins or needs replacement with new door & window. Desire Windows are providing maintenance free latest uPVC windows. We are specialize in the designing , manufacturing and installation. Desire Windows is an end to end service provider right from designing & sizes to installation of windows.

Excellent Thermal Insulation

No matter in which climate windows and doors are installed, they contribute to a cozy & comfortable atmosphere in your home. The thermal insulating performance of finished uPVC window is exceptionally good. It also reduces the electricity bill to cut down A.C. power consumption.

Before

uPVC window with Insulated Glass performance

After

Termite Resistance

In Tropical climate wooden windows are often destroyed by termites, whereas uPVC window & door system are fully resistant to these insects.

Behavior in case of Fire

Fire test shown that uPVC materials, being flame etardant throughout their product life, will not cause, support or enhance the development of accidental fire. The uPVC compound possesses a fire retardant quality that meets International Guidelines.

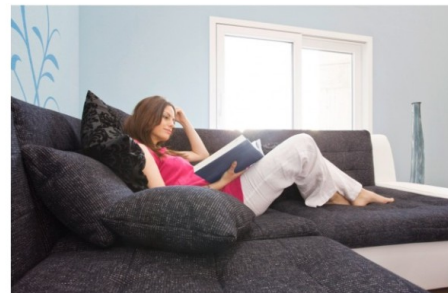

Not Caught The Flame

Sound Insulation

DW uPVC Window Systems utilize a multi cambers profile design with double seal technology that ensures insulation against sound. Installed with appropriate glazing reduction up to 40dB (decibels) are possible thus providing excellent level of sound proofing and assisting effectively in the desire to protect against noise pollution.

Maximum Wind Resistance

Scientific design of our profile systems avoids the penetrations of out door dust air and noise. Due to their excellent material properties , uPVC window & door system are ideal for being installed in buildings where they are permanently exposed to strong wind, heavy rain and salty air. uPVC window can stand in 245 km/h speed of storm.

Material & Structural Performance

The longevity & superior quality of this material has been conclusively proved for almost 40 years. uPVC material compound performs to worldwide standards for strength, durability, heat stability, colour retention and termite resistance. So, it is more cheaper for long span of time.
as compare to wood.

Environment Friendly

uPVC door & window system are capable of protecting from UV index. We are using 100% recyclable, lead free uPVC profile. So, it is a environment friendly product.

Our profile tested with HO₂. uPVC windows are free from the attack of acids, alkalis, waste, and alt. Our uPVC window frame unaffected in heaviest exposure to Monsoon or floods or in extreme summers.

Easy To Install

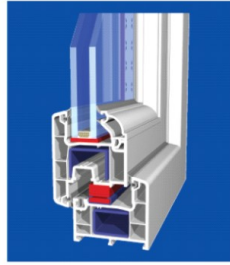

Installation of a uPVC Window is very neat & clean work. Our highly trained technically team done window installation in a very systematically way & Cleanly.
